North Tahoe Public Utility District Expands Rebate Program Offering New Water Saving Options to Residential Water Customers

(Tahoe Vista, California) - Thanks to a grant from Proposition 84, the North Tahoe Public Utility District has been able to expand our water saving appliance credit rebate program for District water customers. Thousands of dollars are available to customers that purchase and install water saving low flow toilets, faucets and shower heads, dishwashers, washing machines and “smart” programmable irrigation controllers with moisture/rain sensors.

Even though this winter has been an improvement over the past few years, State imposed drought restrictions mandating a 28% reduction in residential water consumption remains in place at least through October 2016. The District needs your continued water conservation efforts. Watch for updated information in your bills and your mailbox in the coming months.

A limited number of credit rebates are available in each category so interested customers should apply as soon as possible. For complete details including product specifications, instructions and links to rebate applications visit the How to Conserve Water page on our website at www.ntpud.org/howtoconserve. For more detailed information on the District’s mandatory water restrictions go to www.ntpud.org/conservation

The North Tahoe Public Utility District provides sewer and water service to the residents of Kings Beach, Tahoe Vista, Carnelian Bay, Cedar Flat and Agate Bay. The North Tahoe Regional Park, Tahoe Vista Recreation Area and Boat Launch and North Tahoe Event Center are owned and operated by the District and provide recreation opportunities to residents and visitors.
